

Drift.

aspect 

Experience infinite configuration possibilities with Drift modular seating.

In the ever-evolving landscape of workplace design, the need for more connection and collaboration remains constant. As the boundaries between public and private workspaces blur, the demand for versatile solutions in reception, break-out and meeting areas has become increasingly apparent. Inspired by changing movements and natural forms, Drift is a dynamic and flexible solution that fosters connection and facilitates collaboration within the workplace.

The Drift collection balances soft seating comfort and style with workplace functionality and longevity.

The Drift range allows you to establish agile zones without the need for walls, offering seating configurations for open areas as well as semi-private and private spaces.

Designed and made in New Zealand.

Drift is designed and manufactured in New Zealand by Aspect's in-house team. Our commitment to using sustainably sourced materials ensures the highest quality, consistency and timely delivery of our products.

As furniture designers, our user-centric approach places people at the heart of every decision we make. Drift has been designed to bring people together and we know it will foster productivity, connection and collaboration in its new home.

Drift's organic shapes are a nod to its surroundings, capturing the gentle, ever-changing movements observed in nature. Its seamless blend of earth-inspired aesthetics, materiality and comfort encourages a collaborative flow within the workplace.

Drift modules connect
to shape your space.

Modular design.

Drift modular seating is designed to change with its environment. Modules are easily reconfigured and built upon as spatial requirements and workplace needs evolve.

A collection of base seat units can exist alone or come together to create fluid, organic shapes or traditional sofa formats. Screens can be added for height, privacy and acoustic shielding.

Drift's modular components are made to adapt, change and move with ease.

We believe that high-performing spaces enable high-performing people.

We place a person's comfort and ease-of-use at the heart of every product and system we create. Aspect designers and workplace specialists help you create a complete office furniture solution that will inspire and support people in their work every day.

Back in 1982, from a small factory in Auckland, Aspect founder and CEO Richard Simmons made his very first furniture prototypes. Driven by a passion for craft and beautiful engineering, he steadily grew the business and is joined today by his three sons and an expert team of designers, engineers and workplace specialists across New Zealand and Australia. Today, Aspect makes collections at the leading edge of international product design, technology, and workplace best practice.

Our focus on crafted, fully resolved commercial furniture means Aspect collections are trusted by some of the largest public and private organisations around Australasia. With over 40 years' experience designing and manufacturing collections for the modern workplace, our office furniture has a reputation for being robust, ergonomic, and comfortable throughout the working day.

We make over 70 per cent of our product range in New Zealand and Australia for true control over design, quality, customisation, and lead times. You receive products quickly and reliably from a quality-assured environment. In addition to speed and

flexibility, local manufacturing also creates a smaller environmental footprint.

Our team of product designers and workplace specialists help you define and select a furniture solution to meet your workplace aspirations and project budget using durable and environmentally sound products.

Direct access to our furniture designers means greater flexibility and control over your solution, as we work from our collections, adapt existing products, or design new components.

Aspect Furniture operates ethical and sustainable business practices. We have certification from Good Environmental Choice Australia (GECA) and Environmental Choice New Zealand (ECNZ), and our products are aligned to the Green Star rating tool. Independent certifiers regularly audit our premises under the ISO 9001 and ISO 14001 quality and environmental management systems. Similarly, the health and safety of our employees is vital to our success, so we are certified to the globally recognised AS/NZS 4801 and ISO 45001 occupational health and safety standards.
